SAINSBURY LABORATORY
SYMPOSIUM | 17 - 19 September 2024
Cambridge, UK

This Symposium aims to unite researchers from various disciplines who work with a wide range of species from around the world, all with an interest in understanding developmental variation be it genetically-encoded plasticity or genetically-selected by nature, breeding or rational design.

Invited Speakers

Benjamin Blackman (UC Berkeley)
Caixia Gao (Chinese Academy of Sciences)
Devin O'Connor (Pairwise)
Eric Giraud (Institut de Recherche pour le Développement)
